SUMMARY

Product Designer with 3+ years designing SaaS, AI-powered, and enterprise applications end-to-end — from user research to shipped, accessible UI. Rebuilt a design system that cut product load time by 60%; shipped work across web, mobile, and dashboard products for partners including Autodesk, Daikin, and Adani Group. Fluent in Figma (Auto Layout, Variables, Design Tokens), Agile/Scrum delivery, and WCAG-informed design.

SKILLS

UX: User Research, User Interviews, Journey Mapping, Personas, Information Architecture, User Flows, Wireframing, Usability Testing, A/B Testing, Accessibility (WCAG)

UI: Visual Design, Responsive & Mobile-first Design, Design Systems, Component Libraries, Auto Layout, Variables, Design Tokens, Typography

Tools: Figma (Advanced), FigJam, Adobe XD, Photoshop, Cursor, Claude, Jira, Confluence

Collaboration: Agile/Scrum, Cross-functional Collaboration, Design QA, Stakeholder Management

Technical: HTML, CSS, Python, Java

EXPERIENCE

UX/UI Designer — CCtech

May 2026 – Present

- Reduced application load time by up to 60% by rebuilding a proprietary design system with reusable components, variables, and design tokens, enabling faster handoff across a complex SaaS platform for 3D model rendering and modification.
- Improved cross-team design consistency by establishing shared component libraries and Auto Layout standards, adopted across product surfaces used by partners including Autodesk, OSM, Daikin, and Adani Group.
- Streamlined design-to-dev handoff by introducing structured Design QA checkpoints and closer collaboration with engineering within an Agile/Scrum workflow.

UI/UX Designer — GNX Infinity

Aug 2025 – May 2026

- Increased user adoption of AI-powered SaaS and automation platforms by designing end-to-end workflows, dashboards, and chatbot interfaces grounded in user research and usability testing.
- Scaled a reusable design system across multiple products by defining component libraries, typography, and color systems, cutting new-feature design time.
- Improved stakeholder alignment and reduced revision cycles by running structured design reviews and translating cross-functional business requirements into user flows and wireframes.

UI/UX Designer — Civiccraft

Mar 2024 – Mar 2025

- Increased task completion rates on government-focused web and mobile applications by conducting user research, usability testing, and iterative wireframing/prototyping in Figma.
- Improved accessibility compliance by auditing key flows against WCAG standards and revising interaction patterns for public-sector users with varying digital literacy.

UI/UX Designer (Freelance) — Independent

Sep 2023 – Feb 2024

- Delivered end-to-end product redesigns for international clients by conducting user research and competitive analysis, improving usability across web and mobile.
- Placed in global design competitions by producing high-fidelity UI concepts under sprint-style timelines, sharpening rapid prototyping skills.

UI/UX Designer — Megabit Systems

Mar 2023 – Aug 2023

- Contributed to A/B test-driven conversion improvements by designing and testing UI variants, illustrations, and branding assets in close collaboration with developers.
- Reduced design-to-development discrepancies by establishing a tighter feedback loop and QA process with the engineering team.

EDUCATION

B.Tech, Computer Engineering

2021 – 2024

Dr. Babasaheb Ambedkar Technological University, Mangaon

CERTIFICATIONS

- Udemy Certified UI/UX Designer
- Figma UI/UX Advanced
- HTML & CSS Certification — SoloLearn
